

Judicial Committee

House Bill 6687

April 1, 2013 Testimony

Senator Coleman, Representative Fox and distinguished committee members,

My name is Harold S. Harris. I am a 66 year old engineer and resident of Glastonbury. I am speaking as a concerned citizen. I am in opposition to actions that encourage the increase in malpractice law suits. As an engineer and an owner of a small manufacturing company, I have seen firsthand how products that would improve our health and safety have been kept from the market because of the concern for law suits. These same concerns affect my doctors and result in increased cost and earlier retirements. (I have examples if you desire.)

I watch injury lawyer's TV commercials every night. They are all I need to know about the risk that lurks for those of us that dare to take on the challenge to improve the well being of our fellow citizens. No good deed goes unpunished.

Harold S. Harris

Chief Engineer
